South Sudan 20MW Power Plant

26-Jul-2013

PV Tech and The Republic of South Sudan Central Equatoria State Sign Agreement to Build a 20MW Power Plant

JUBA, South Sudan (July 18, 2013) – PV Tech South Sudan Limited, a subsidiary of US based PV Tech Inc., and the Republic of South Sudan – Central Equatoria State have entered into an agreement where PV Tech South Sudan will build a 20MW hybrid power plant (Combustion and Solar).

"There is a great need for clean energy in South Sudan and this is a great example of the state government collaborating with the private sector to meet its energy needs. We are honored and excited to be a part of the development of South Sudan," said Fred Anguka, CEO and Chairman of PV Tech Inc. "In this case, our understanding of the African market, our expertise in renewable energy along with the strong partnerships that we have cultivated, made us the right choice to collaborate with the Republic of South Sudan - Central Equatoria State." "Furthermore, this is a fine example of the United States' initiative to "Power Africa" in action. "

PV Tech is a solar energy company dedicated to improving the environment, the African economy and its renewable energy industry, and generating attractive financial returns. We create jobs locally, build capacity, and establish synergistic operating units in our host countries, and help grow the businesses of our operating and channel partners.
